DESDE 1957

1957 foi o ano em que António Joaquim de Almeida Pinto fundou a PAJÁ, iniciando o fabrico de ferragens e ferramentas para a indústria da construção e mobiliário. Destacada pela qualidade dos seus produtos foi sempre uma empresa moderna dotada das mais avançadas tecnologias, que com o seu carácter familiar, permitiram construir a base para uma excelente relação preço/qualidade.

A aposta na satisfação do cliente aliada ao conceito made in portugal faz com que a PAJÁ lidere nichos de mercado através da produção de produtos fora do standard sob encomenda.

Com linhas modernas de latão ou aço inox encontram nos seus produtos a incorporação de materiais como pele, cristal, porcelana e mesmo cortiça.

A PAJÁ orgulha-se de ter sido uma das primeiras empresas que conseguiu aliar ao certificado da qualidade ISO NP EN 9001:2000 o certificado ambiental através da norma ISO NP EN 14001:2004.

SINCE

It was back in 1957 that António Joaquim Almeida Pinto established PAJÁ, begining to produce tooling and hardware for furniture and building industry.

Quality standards were always his main target and allied to modern technologies, this familiar enterprise allowed having a very competitive relation between price and quality.

Orientated to costumer satisfaction and proudly using the concept made in Portugal gives PAJÁ possibilities to lead small markets and work to specifications out of standards.

With modern design in brass or stainless steel you'll find on our range, different products such as leather, crystal, wood, porcelain and even cork.

PAJÁ is proud of being one of the first of its kind to have both quality ISO NP EN 9001:2000 and environmental ISO NP EN 14001:2004 certificates.

A PAJÁ tem como actividade principal a produção de ferragens para mobiliário e construção.

O nosso catálogo é composto por puxadores para portas, puxadores para armários, ferragens diversas (fechos, cremones, etc.) e diversos acessórios (espelhos, asas, bloqueios de wc, cabides, etc).

As matérias primas utilizadas no fabrico destes artigos são essencialmente o latão (CuZn40Pb2) e o aço inox (AISI 304/AISI 316).

CRIAMOS À SUA MEDIDA

WE CREATE FOR YOU

PAJÁ has, as main activity hardware manufacturing for furniture and building.

In our catalogue we present you with door knobs and handles, furniture hardware, window fasteners and bolts, and all kinds of accessories like pull handles, finger plates, wc turn & releases and hooks.

Raw materials used on these products are mainly brass and stainless steel.

CONSERVAÇÃO

Para uma boa conservação dos artigos Pajá deve ter em atenção as seguintes considerações: Montar os puxadores quando as portas estiverem aplicadas e envernizadas; Não limpar com produtos de limpeza comuns, mas apenas com um pano macio seco ou ligeiramente humedecido; Não permitir a limpeza de compartimentos com ácidos depois dos artigos Pajá aplicados, a acção do ácido atacará todos os materiais metálicos. **As condições de garantia só serão aceites se estas indicações forem cumpridas.** Os artigos são produzidos com matéria prima de qualidade, latão (CuZn40Pb2), e tratamento final com verniz muito duro, com resistência ao desgaste e largas horas de resistência ao nevoeiro salino, segundo as especificações do fornecedor, pelo que se manterá inalterável durante anos se se observar os pormenores acima descritos. Ressalvamos o ponto anterior, quando expostos a acções prolongadas de ambiente marítimo, poeiras de cimento ou outros ambientes corrosivos; Para conservar o Aço Inoxidável (AISI 304/ AISI 316), limpar marcas de dedos, gorduras e outras manchas, pode utilizar um produto próprio para o Aço Inoxidável, aplicando-o com um pano macio e seco.

PRESERVATION

For the good preservation of Pajá articles, please observe the following instructions: Fix the lever only after the installation of the door already lacquered; Do not clean with any products, but only with a dry or slightly humid cloth; Take care not using any acid products when cleaning the area, because acids affect metal products; This products are produced with high quality raw materials, Brass (CuZn40Pb2), and final treatment very hard varnish, high resistance to wear, as well good resistance to sea moisture; according to the varnish suppliers, and following the instructions mentioned, it should last some years unaltered; ***Should the above not be followed, the supplier shall not accept any responsibility for the damages that may occur****. To conserve the stainless steel (AISI 304/ AISI 316), to clean marks of fingers, spots, etc., can use a product for inox, applied according to the product instructions.*

MONTAGEM COM PLACA SOLTA

ESQUEMA

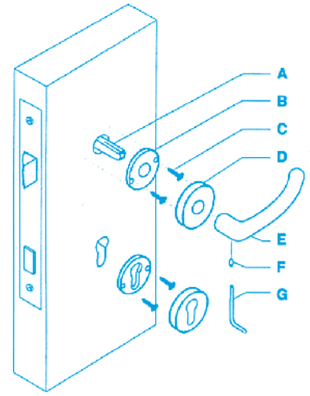

1 - Colocar (A) na fechadura com o rasgo para baixo;
2 - Montar a placa utilizando os parafusos(C);
3 - Fixar à pressão, a cobertura (D) na placa (B);
4 - Inserir a muleta (E) na quadra (A) e apertar o perno de fixação (F) utilizando a chave de Unbrako de 3mm (G).

NOTA: O posicionamento do perno no centro do rasgo da quadra garante uma boa montagem

TO ASSEMBLE:

1 - Take the spindle (A) and insert it through the lock with the larger groove side down;
2 - Install the anchor plates (B) and fix them with correct screws (C);
3 - Fix the cover (D) on the anchor plate by applying finger pressure;
4 - Fix the leaver handle (E) on to the spindle (A) and then tight on with grub screw (F) to the spindle (A) using Allen key (G).

NOTE: It is most important that the grub screw (F) position is well centred in the spindle's slot.

LEGENDA:	*SUBTITLE:*
A - Quadra	*A - Spindle*
